RAISING EXPECTATIONS

OVERHEAD CRANE DOUBLE GIRDER

The **STREET DOUBLE GIRDER OVERHEAD CRANE** is for capacities up to 80 tonne and is suited to indoor and outdoor applications. This is just part of Red Rooster Lifting's full range of Street equipment available.

Street double girder cranes can be engineered into the roof space within a building where the maximum lifting height is a primary requirement inside a building. The crab/trolley on a double girder can also provide better side hook approaches than a single girder crane particularly where large lifting heights are specified.

Double girder cranes are available in capacities up to 80 tonnes equipped with our ZX wire rope hoists and up to 200 tonnes using our heavier duty VX hoist. Our top running double girders are designed to run on either four or eight long travel wheels depending on the allowable wheel loads and multiple trolley gauges are available to accommodate different lifting heights.

Street Crane is the UK's largest overhead crane manufacturer with specialist lifting knowledge across every key industrial sector.

ADVANTAGES OF STREET DOUBLE GIRDER CRANES WITH ZX HOISTS.

- Extra hoist brake safety
- Additional protection against overloading
- No external hoist gears
- Double band rope guide*
- Hoist gear inspection facility
- Hoist motor coupling inspection facility
- Hoist hand brake release
- Variable speed travel and traverse
- No external trolley gears
- Unique electrical protection and hours in service meter
