LIFTING**

RAISING EXPECTATIONS

OVERHEAD CRANE SINGLE GIRDER

The **STREET SINGLE GIRDER OVERHEAD CRANE** is for all capacities up to 25 tonne and is suited to indoor and outdoor applications. This is just part of Red Rooster Lifting's full range of Street equipment available.

Street single girder cranes are our most popular type of overhead crane as they provide the most cost-effective lifting solution for all capacities to 25 tonnes for indoor or outdoor applications. Our top running single girder solutions deliver the same levels of reliability and performance as all of our other cranes but the lower wheel loads of a single girder have lower building and structural support costs associated with them and therefore offer a more attractive price to performance ratio.

Depending on your application our single girder cranes incorporate either our ZX wire rope hoists or our LX chain hoists at very low capacities or when an extra competitive solution is required.

Street Crane is the UK's largest overhead crane manufacturer with specialist lifting knowledge across every key industrial sector.

ADVANTAGES OF STREET SINGLE GIRDER CRANES WITH ZX HOISTS.

- Extra hoist brake safety
- Additional protection against overloading
- No external hoist gears
- Double band rope guide
- Hoist gear inspection facility
- Unique fail-safe hoist drum
- Variable speed travel and traverse
- No external trolley gears
- Sturdy trolley side rollers
- Trolley reaction roller precludes the need for a counterweight.
